Objective

- Ambitious Software Engineer specializing in Software Engineering, seeking a software engineering jobs to apply skills in full-stack development, cloud computing (AWS), and agile methodologies. Eager to contribute to impactful software projects and collaborate with a dynamic team.

Education

Bachelor of Science in Computer Science

German International University (GIU)

Major: Software Engineering

(2021–Present)

Expected Graduation: July 2025

Bachelor's Thesis: *Security Issues in Cloud Computing*

• **Duration:** 4 months **Grade:** A

• **Key Contributions:**

- Developed a real-time monitoring system to detect and classify Spectre-like side-channel attacks.
- Implemented threshold-based anomaly detection and adaptive noise injection mechanisms.

• **Achievements:** Achieved detection accuracy exceeding 92% and maintained system performance with under 5% overhead.

Experience

Front-End Engineer Intern, Money Fellows (Fintech)

(Feb 2025–Present)

- **Card Squad Contributor:** Collaborate with a senior engineer on card-related features for the Money Fellows app, supporting design, implementation, and optimization efforts.
- **Agile Participation:** Take part in sprint planning and execution, helping to refine user stories and deliver assigned tasks on time.
- **UI Development:** Contribute to building responsive interfaces with Angular & Ionic (Reactive Forms, RxJS, Angular CLI, TypeScript); work closely with the UI team and UX writer via Figma.
- **Code Review and Standards:** Follow established coding guidelines, prepare pull requests, and participate in code reviews to improve code quality.
- **Development Support:** Assist in the software lifecycle, including requirement gathering, testing (automated and manual), product review feedback, and CI/CD deployment tasks using GitHub Actions.

Skills

Programming Languages: JavaScript (ES6), HTML, CSS, SQL, NoSQL

Frameworks/Libraries: Express.js, React.js, Tailwind CSS

Databases: PostgreSQL, MongoDB

Cloud Services: AWS (Certified Cloud Practitioner)

Version Control: Git

Development Methodologies: Agile Scrum

Languages: Arabic, English (Fluent), German (Beginner)

Projects

Imagify - AI Text to Image Generator

Duration: 10 days.

Date: 2024.

Developed a full-stack web application for AI-based image generation from text prompts.

Implemented secure user authentication with JWT and password hashing.

Managed a user credits system for tracking and purchasing additional credits.

Technologies: React, Tailwind CSS, react-Context, react-toastify, Node.js, JWT-token, Express.js, MongoDB, [GitHub Repository](#).

Natours

Duration: 2 months.

Date: 2024.

Developed a full-stack tour booking application enabling users to browse, book, and manage tours seamlessly.

Integrated Stripe API for secure payment processing and Nodemailer for automated email notifications.

Applied advanced security measures including data sanitization, rate limiting, and comprehensive error handling.

Technologies: Node.js, Express.js, Session-cookies, Nodemailer, MongoDB, Pug, Stripe API, [GitHub Repository](#).

Cairo Metro System

Duration: 1 month.

Date: 2023.

Collaborated with a team of 4 members to develop a transit system app for Cairo Metro with efficient management and information access.

Implemented advanced route planning with optimal path suggestions and a ticketing system supporting various passes.

Integrated a real-time customer support chat system for enhanced user assistance.

Technologies: Next.js, Node.js, MongoDB, Figma, [GitHub Repository](#).

Help Desk System

Duration: 1 month..

Date: 2023.

Led a team of 8 members to develop a Help Desk System for efficient support ticket tracking and management.

Leveraged Socket.IO for real-time ticket status updates and staff-user communication.

Created a Knowledge Base with searchable common issues for user self-help.

Technologies: React.js, Node.js, Express.js, MongoDB, Socket.IO, [GitHub Repository](#).

Microservices Ecommerce Website

Duration: 3 months..

Date: 2023.

Collaborated with a team of 4 members to develop a scalable ecommerce platform using microservices architecture.

Implemented key features including user authentication, product management, shopping cart, checkout process, and real-time communication between services using Kafka.

Dockerized the application for efficient deployment and utilized MongoDB for robust data storage solutions.

Technologies: Next.js, NestJS, MongoDB, Kafka, Docker, [GitHub Repository](#).

E-commerce Mobile App

Duration: 2 weeks.

Date: 2024.

Collaborated with a team of 4 members to develop a cross-platform mobile app for vendors and shoppers using Flutter and Firebase.

Implemented user authentication and authorization for both vendors and shoppers, including SignUP/SignIn and User Profile screens.

Developed several screens with navigations such as bottom tabs and drawers, ensuring a seamless user experience.

Utilized Firebase Firestore as the online database to manage Users and Products data.

Enabled image uploads through the gallery and camera, associating uploaded images with respective products.

Technologies: Flutter, Firebase Firestore, Dart, [GitHub Repository](#).

SoftWareCloud Application

Duration: 3 weeks..

Date: 2024.

Collaborated with a team of 4 members to design and implement a highly available web application using a JavaScript stack, hosted on AWS EC2 instances across multiple Availability Zones.

Developed CRUD functionalities on a custom dataset, leveraging DynamoDB for efficient data storage and management.

Integrated AWS services including S3 for image uploads, CloudFront for content delivery, and utilized AWS SDK for seamless backend interactions.

Technologies: AWS (EC2, DynamoDB, S3, CloudFront, Lambda, API Gateway, ELB), Node.js, Express.js, React, AWS SDK, [GitHub Repository](#).

Project Management

Duration: 1 month..

Date: 2024.

Acted as the Project Owner responsible for interviewing the client (professor), collecting and analyzing requirements, and distributing them to team members.

Led a team of 10 members, coordinating roles including Scrum Master, backend and frontend developers, software architects, database administrators, and UX designers.

Managed the product backlog using Asana, facilitated sprint planning and review meetings, and ensured timely delivery of project milestones.

Coordinated daily standup meetings to track progress, address impediments, and align team efforts with project goals.

Technologies: Asana, Zoom/MS Teams, GitHub, Node.js, React, GitHub Repository.

Online Courses

- **Node.js, Express, and MongoDB Bootcamp (Udemy)**
- **AWS Certified Cloud Practitioner (Udemy)**
- **The Ultimate React Course (Udemy)** (*Basic knowledge*)
- **HTML5 and CSS3 (Udemy)**
- **The Complete JavaScript Course (Udemy)**
- **Master the Coding Interview: Data Structures + Algorithms (Udemy)**
